@booxood @lex111 @mamboer

问题描述

我根据这篇教程配的，过程完全一模一样，但是配完后打开每篇文章（没有报任何错），没有评论框，只有如下 gitalk 提示：

> 未找到相关的 Issues 进行评论
>
> 请联系 @qhh0205 初始化创建
>
> 使用 Github 登录

我点击底下的登录按钮后直接进入 github 博客仓库了，并没有 issue 产生，这是什么原因呢？而且返回页面后还是这样，没有什么变化，一直显示没有相关 issue。。
我的 blog 地址： *https://qhh0205.github.io/*

主要配置

next 主题文件 gitalk 配置：

```
gitalk:
  enable: true
  githubID: qhh0205
  repo: qhh0205.github.io
  ClientID: ████████████████████
  ClientSecret: ████████████████████████
  adminUser: qhh0205
  distractionFreeMode: true
```

layout/_third-party/comments/gitalk.swig 文件：

```
{% if page.comments && theme.gitalk.enable %}
  <link rel="stylesheet" href="https://unpkg.com/gitalk/dist/gitalk.css">
  <script src="https://unpkg.com/gitalk/dist/gitalk.min.js"></script>
   <script type="text/javascript">
        var gitalk = new Gitalk({
          clientID: '{{ theme.gitalk.ClientID }}',
          clientSecret: '{{ theme.gitalk.ClientSecret }}',
          repo: '{{ theme.gitalk.repo }}',
          owner: '{{ theme.gitalk.githubID }}',
          admin: ['{{ theme.gitalk.adminUser }}'],
          id: location.pathname,
          distractionFreeMode: '{{ theme.gitalk.distractionFreeMode }}'
        })
        gitalk.render('gitalk-container')
    </script>
{% endif %}
```

用 Chrome 检查工具看了下，应该是 api 认证失败导致，我看调用 github api 认证失败，但是我仔细检查了下认证的 id 和 secreat key 都没问题啊：

iochen commented 9 hours ago

```
clientSecret: '1b6012e1e5285973c24da9ed9'
repo: 'qhh0205.github.io',
owner: 'qhh0205'.
```
填repo名字，不是填地址

iochen commented 9 hours ago

同时，建议不要使用中文为post文件名，

https://qhh0205.github.io/2018/03/24/Python-两大环境管理神器：pyenv-和-virtualenv/

详见 #102 (comment)

qhh0205 commented 9 hours ago

@iochen
我的仓库的名字就是 `qhh0205.github.io`
https://github.com/qhh0205/qhh0205.github.io

iochen commented 9 hours ago • edited ▾

好吧，是我看错了……看看下一个方案有没有用，我以前就吃过文件名过长的坑

Hexo中Gitalk配置使用教程-可能是目前最详细的教程 | ioChen's Blog #3　　　　⊙ Open

qhh0205 commented 9 hours ago

@iochen
应该不是文件名过长问题，我刚新建了一个 post，名称为：`test`，这个够短了吧，但是还是同样的问题。
https://qhh0205.github.io/2018/03/25/test/

回调地址确认一下
在这里 https://github.com/settings/developers 修改

iochen commented 8 hours ago

Authorization callback URL

https://iochen.com

Your application's callback URL. Read our OAuth documentation for more information.

这是我的

👍 1   😄 2

qhh0205 commented 8 hours ago

@iochen
回调地址也是没问题的：

Application name

qhh0205.github.io

Something users will recognize and trust

Homepage URL

https://github.com/qhh0205/qhh0205.github.io

The full URL to your application homepage

Application description

qhh0205 gitalk 评论

This is displayed to all users of your application

Authorization callback URL

https://github.com/qhh0205/qhh0205.github.io/

Your application's callback URL. Read our OAuth documentation for more information.

Update application   **Delete application**

qhh0205 commented 8 hours ago

@iochen 回调地址是博客地址吗？还是仓库地址

qhh0205 commented 8 hours ago • edited ▾

@iochen 非常感谢啊🙏，可以了，是回调地址不对，改成博客地址就 ok 了！！

Homepage URL

```
https://qhh0205.github.io/
```

The full URL to your application homepage

Application description

```
qhh0205 gitalk 评论
```

This is displayed to all users of your application

Authorization callback URL

```
https://qhh0205.github.io/
```

Your application's callback URL. Read our OAuth documentation for more information.

Update application　　**Delete application**

不过出现之前的老问题了：`Error: Validation Failed.`
就是中文标题导致编码过长的问题，这个现在应该有好的解决方法了吧？
关于 `Error: Validation Failed.` 问题我再参考下 #102

Error: Validation Failed.

说点什么

@iochen 你好麻烦再请教下，我按照之前的 issue #102 用 md5 加密 id，本地 npm install md5 是成功的。
但是没生效，blog 页面底下评论框都没了，不知道什么原因。。。
blog 地址：http://qhh0205.github.io/
具体配置如下：

```
{% if page.comments && theme.gitalk.enable %}
  <link rel="stylesheet" href="https://unpkg.com/gitalk/dist/gitalk.css">
  <script src="https://unpkg.com/gitalk/dist/gitalk.min.js"></script>
   <script type="text/javascript">
        var gitalk = new Gitalk({
            clientID: '3840ba8c8d80c18be7e3',
            clientSecret: '1b00f2efe5285973c24da9ed9ac895775eacc8ea',
            repo: '{{ theme.gitalk.repo }}',
            owner: '{{ theme.gitalk.githubID }}',
            admin: ['{{ theme.gitalk.adminUser }}'],
            id: md5(location.pathname),
            distractionFreeMode: '{{ theme.gitalk.distractionFreeMode }}'
        })
        gitalk.render('gitalk-container')
    </script>
{% endif %}
```

---

iochen commented 6 hours ago

@qhh0205 将 https://github.com/blueimp/JavaScript-MD5/blob/master/js/md5.min.js 下载放到你hexo 的js文件夹中，然后在配置上方加上 `<script src="这里是你的MD5的js的路径"></script>`

就像这样

```
{% if page.comments && theme.gitalk.enable %}

  <link rel="stylesheet" href="https://unpkg.com/gitalk/dist/gitalk.css">

  <script src="https://unpkg.com/gitalk/dist/gitalk.min.js"></script>
  <script src="/js/src/md5.min.js"></script>

  <script type="text/javascript">
      var gitalk = new Gitalk({
        clientID: '{{ theme.gitalk.ClientID }}',
        clientSecret: '{{ theme.gitalk.ClientSecret }}',
        repo: '{{ theme.gitalk.repo }}',
        owner: '{{ theme.gitalk.owner }}',
        admin: ['{{ theme.gitalk.adminUser }}'],
        id: md5({{ theme.gitalk.ID }}),
        perPage: {{ theme.gitalk.perPage }},
        pagerDirection: '{{ theme.gitalk.pagerDirection }}',
        createIssueManually: {{ theme.gitalk.createIssueManually }},
        distractionFreeMode: {{ theme.gitalk.distractionFreeMode }}
      })

      gitalk.render('gitalk-container')
    </script>
{% endif %}
```
然后上传测试一下，我自己测试了一下。可以

@iochen 非常感谢，又帮我解决了个问题。
我没有本地加载，我选择远程加载了下，我一般把代码片段都保存成了 gist，所以我创建了个 gitst，然后远程引入 js gist 地址。
在此把具体过程详细写下，献给小白朋友们（当然我也是 QAQ）：

解决：gitalk 报错 `Error: Validation Failed.` --MD5 加密 `id` 避免 github issue lables 50 字符限制

1. 创建一个github gist 文件保存 https://github.com/blueimp/JavaScript-MD5/blob/master/js/md5.min.js js 源码：
   https://gist.githubusercontent.com/qhh0205/78e9e0b1f3114db6737f3ed8cdd51d3a/raw/3894c5be5aa2378336b1f5ee0f296fa0b22d06e9/md5.min.js

2. 将 gist 链接嵌入到 `layout/_third-party/comments/gitalk.swig` 文件，嵌入时的 js 链接地址需要注意下：
   不能直接写第一步的创建的 gitst 链接地址，需要将 `gist.githubusercontent.com` 替换为 `rawgit.com`。即嵌入地址为：
   https://rawgit.com/qhh0205/78e9e0b1f3114db6737f3ed8cdd51d3a/raw/3894c5be5aa2378336b1f5ee0f296fa0b22d06e9/md5.min.js
   最终 `layout/_third-party/comments/gitalk.swig` 配置如下：

```
{% if page.comments && theme.gitalk.enable %}
  <link rel="stylesheet" href="https://unpkg.com/gitalk/dist/gitalk.css">
  <script src="https://unpkg.com/gitalk/dist/gitalk.min.js"></script>
  <script src="https://rawgit.com/qhh0205/78e9e0b1f3114db6737f3ed8cdd51d3a/raw/3894c5be5aa2
   <script type="text/javascript">
      var gitalk = new Gitalk({
        clientID: '3840ba8c8d80c18be7e3',
        clientSecret: '1b00f2efe5285973c24da9ed9ac895775eacc8ea',
        repo: '{{ theme.gitalk.repo }}',
        owner: '{{ theme.gitalk.githubID }}',
        admin: ['{{ theme.gitalk.adminUser }}'],
        id: md5(location.pathname),
        distractionFreeMode: '{{ theme.gitalk.distractionFreeMode }}'
      })
      gitalk.render('gitalk-container')
    </script>
{% endif %}
```
